

CISA ADVISORY

Russian Cyber Actors Targeting the Energy Sector

March 24, 2022

Swipe →

SUMMARY

Multiple intrusion campaigns conducted by state-sponsored Russian cyber actors from 2011 to 2018 and targeted U.S. and international Energy Sector organizations.

Swipe →

DETAIL

DOJ unsealed indictments of FSB officers and a Russian Federation Central Scientific Research Institute of Chemistry and Mechanics (TsNIIKhM) employee for involvement in intrusion campaigns against U.S. and international oil refineries, nuclear facilities, and energy companies.

ACTIONS

- Implement network segmentation between IT and ICS networks.
- Enforce MFA to authenticate to a system.
- Manage the creation, modification, use, and permissions associated with privileged accounts.
